

SAMPLE REPORT — FICTIONAL DATA FOR ILLUSTRATION ONLY

Flintwood.

SOC 2 READINESS REPORT

Acme Corp

AWS Environment · [REDACTED]

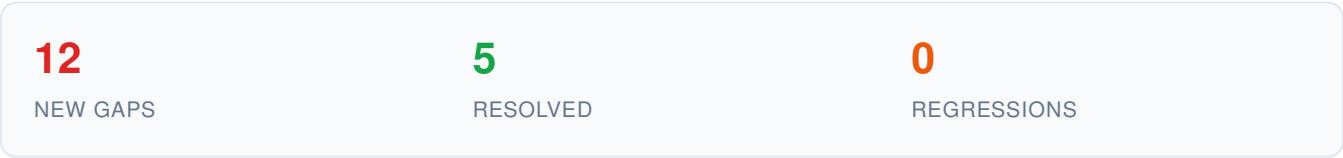

May 14, 2026 · Regions: us-east-1, us-west-2

This report was generated by Flintwood and reviewed by a human analyst before delivery. It is confidential and intended solely for Acme Corp. Findings reflect the state of your AWS environment at time of scan and are not a guarantee of SOC 2 certification readiness.

Executive Summary

Changes Since Last Report

Control Family Status

CONTROL FAMILY	TOTAL CHECKS	PASSING	FAILING / GAP	CRITICAL	COVERAGE
AI_RISK AI & Agentive Risk	4	0	4	1	0%
CC6 Logical Access Controls	5	2	3	1	40%
CC7 System Operations	5	1	4	0	20%
CC8 Change Management	2	1	1	0	50%

AI & Agentic Tool Risk

Flintwood proprietary analysis — not part of standard SOC 2 TSC checks

⚠ Immediate Attention Required

1 critical and 2 high AI risk findings require remediation. These findings represent gaps in AI governance that could affect your SOC 2 audit posture and introduce real security risk from autonomous or over-permissioned AI workloads.

Over-permissioned Bedrock agent role

CRITICAL AI RISK AI_RISK.1

arn:aws:iam::[REDACTED]:role/bedrock-agent-prod

REMEDIATION

Scope bedrock:InvokeModel to specific model ARNs. Remove S3 write permissions or add explicit MFA condition.

Bedrock invocation logging disabled

HIGH AI RISK AI_RISK.2

arn:aws:bedrock:us-east-1:[REDACTED]:logging-config

REMEDIATION

Enable Bedrock model invocation logging to S3 or CloudWatch. Configure 90-day retention.

Autonomous Lambda chain without approval gate

HIGH AI RISK AI_RISK.3

arn:aws:lambda:us-east-1:[REDACTED]:function/ai-processor

REMEDIATION

Implement a human approval step via Step Functions before write operations.

Shadow AI workloads detected

MEDIUM AI RISK AI_RISK.4

arn:aws:iam::[REDACTED]:role/*

REMEDIATION

Tag all AI workloads and audit untagged Bedrock callers.

Critical & High Findings

Critical

Over-permissioned Bedrock agent role

CRITICAL AI AI_RISK.1

arn:aws:iam::[REDACTED]:role/bedrock-agent-prod

REMEDIATION

Scope bedrock:InvokeModel to specific model ARNs. Remove S3 write permissions or add explicit MFA condition.

Root account access keys active

CRITICAL CC6.3

arn:aws:iam::[REDACTED]:root

REMEDIATION

Delete root access keys immediately via IAM console.

High

Bedrock invocation logging disabled

HIGH AI AI_RISK.2

arn:aws:bedrock:us-east-1:[REDACTED]:logging-config

REMEDIATION

Enable Bedrock model invocation logging to S3 or CloudWatch. Configure 90-day retention.

Autonomous Lambda chain without approval gate

HIGH AI AI_RISK.3

arn:aws:lambda:us-east-1:[REDACTED]:function/ai-processor

REMEDIATION

Implement a human approval step via Step Functions before write operations.

IAM users without MFA

HIGH CC6.2

arn:aws:iam::[REDACTED]:user/*

REMEDIATION

Enforce MFA for all IAM users with console access.

CloudTrail log validation disabled

HIGH CC7.1

arn:aws:cloudtrail:us-east-1:[REDACTED]:trail/management-trail

REMEDIATION

Enable log file validation on all CloudTrail trails

Remediation Roadmap

Prioritized by severity. Address P1 items before your next audit conversation.

P1 — FIX IMMEDIATELY

- P1

Over-permissioned Bedrock agent role AI

Scope bedrock:InvokeModel to specific model ARNs. Remove S3 write permissions or add explicit MFA condition.
- P1

Root account access keys active

Delete root access keys immediately via IAM console.

P2 — FIX WITHIN 30 DAYS

- P2

Bedrock invocation logging disabled AI

Enable Bedrock model invocation logging to S3 or CloudWatch. Configure 90-day retention.
- P2

CloudTrail log validation disabled

Enable log file validation on all CloudTrail trails.
- P2

IAM users without MFA

Enforce MFA for all IAM users with console access.
- P2

Autonomous Lambda chain without approval gate AI

Implement a human approval step via Step Functions before write operations.

P3 — FIX WITHIN 90 DAYS

- P3

S3 buckets missing access logging

Enable S3 server access logging on all buckets containing sensitive data.
- P3

AWS Config recorder stopped in us-west-2

Enable AWS Config recorder in all active regions.
- P3

Shadow AI workloads detected

Tag all AI workloads and audit untagged Bedrock callers.
- P3

GuardDuty finding: TorIPCaller

Immediately rotate credentials for affected IAM user.

All Findings by Control Family

CC6 — Logical Access Controls

Root account access keys active	CRITICAL	X FAIL	CC6.3
arn:aws:iam::[REDACTED]:root			
REMEDIATION Delete root access keys immediately via IAM console.			
IAM users without MFA	HIGH	X FAIL	CC6.2
arn:aws:iam::[REDACTED]:user/*			
REMEDIATION Enforce MFA for all IAM users with console access.			
Password policy: no 90-day rotation	LOW	X FAIL	CC6.5
arn:aws:iam::[REDACTED]:account-summary			
REMEDIATION Update IAM password policy to require password change every 90 days.			

CC7 — System Operations

CloudTrail log validation disabled	HIGH	X FAIL	CC7.1
arn:aws:cloudtrail:us-east-1:[REDACTED]:trail/management-trail			
REMEDIATION Enable log file validation on all CloudTrail trails.			
S3 buckets missing access logging	MEDIUM	X FAIL	CC7.4
arn:aws:s3::acme-customer-data			
REMEDIATION Enable S3 server access logging on all buckets containing sensitive data.			
GuardDuty finding: TorIPCaller	MEDIUM	X FAIL	CC7.3
arn:aws:guardduty:us-east-1:[REDACTED]:detector/abc123			
REMEDIATION Immediately rotate credentials for affected IAM user			

CloudTrail not delivering to CloudWatch Logs

LOW

X FAIL CC7.2

arn:aws:cloudtrail:us-east-1:[REDACTED]:trail/management-trail

REMEDIATION

Configure CloudTrail to deliver logs to CloudWatch Logs.

CC8 — Change Management

AWS Config recorder stopped in us-west-2

MEDIUM

X FAIL CC8.2

arn:aws:config:us-west-2:[REDACTED]:configuration-recorder

REMEDIATION

Enable AWS Config recorder in all active regions.
